JUNA CHOE (7pm)

Josh Price

Chris Li (8PM)

* first off, all of this is blasphemous
I hope you're proud of yourselves for
defiling this logbook

Agreed
Christopher

Jupiter (through blood)
maybe some why here?

Used an app to check after test-outs
maybe 4th moon? could keep the damn thing
NOT what steady was predicted. Failure.

* new project: start from zero knowledge with a better record of moons' distances in Jupiter radii

11/20/22 Christopher Prainito => Observed Jupiter around 11pm-12am

Got very windy but closed dome before gusts got strong!

Fairly clear image with all 4 moons present and accounted for :)

Moan Payer
Saima Itaque
Michelle Juing
Alessandro Drake

4th moon pretty far out -> 32 mm esp. to see full planet + moons image

Looked at some stars for a change
Sirius was brilliant w/ the 32 mm
stopped when wind picked up

- preparing imaging gear, telescopes, & organizing for tomorrow night's dark sky trip to Cope Cod - very excited for prospect of Astrophotography

Kendall Heman

4/8

10:02 am. Aeden Marcus

- Booked the room during the day to call my grandma from the Observatory. Today is just ridiculously sunny and crisp. It feels like spring is here to stay.

11:11 am

- had a dance party with just me out on the deck. A lovely Saturday! ♡
