Took the CRIMSON Summer Academy girls for some sightseeing! ☺

We looked through the ~~telescope~~ binoculars — Thanks Aylin

- It was my first time being in an observatory — it was amazing and GREAT to use the binoculars. Thanks! — Karen Aubourg

- I had so much fun using your binoculars. Also, I love the pictures you have that represent the constellations. This was so awesome!! Thanks a lot

Sincerely,  
Cassandra J.

Viewed globular clusters M54, M69, M70. M54 was very bright and easy to find but the others weren't. Couldn't find M55. Found M21 but couldn't see M20. Found part of M8, Lagoon Nebula, and NGC 6530.

J was excellent, even w/ 6mm lens. Saw one moon just emerge

Let's get the observatory vacuumed.  
 The floor is dirty.

8/4/2011 8:30AM Telescope stored terribly - and no one signed the logbook. Motherfuckers. The red lights knob was on the floor.
