4/14/2017 David F. Clifton 21:42

After going to the panel discussion "Are We Alone?" in Sanders Theatre as part of the Cambridge Science Festival, I just had to come up here and see Jupiter on a clear night, and boy was that the right move. For the first time ever I saw all four Galilean moons at once, as well as Jupiter's cloud bands! Simply wonderful. I'm so glad I saw that before graduating.

Apr. 14, 2017

Frank C. & Shao

→ Jupiter:

→ Visible: at least two brown bands in clouds

→ Four moons around Jupiter

→ M44 - Beehive (Open Cluster)

→ Many stars visible in a very wide field

→ Pollux in Gemini

* Photos taken using Canon 60D Camera.

04/15: AABE KAYOR

Too cloudy to see anything.

12/22 Came in to check out the observation deck. Someone did not turn the motor off!

Ahmed Osman↳ thanks for checking!
- EAM.

12/22 Jungyeon Park Mirac Surgen.

12/28 The perks of observing at -15°C: Clear skies, good transparency and overall great viewing conditions!

The downside of observing at -15°C: Need to observe wearing snowboarding gloves because IT'S #@*3ING COLD.

☑ Orion nebula

Ahmed Omran

☑ Rigel

☑ Andromeda (couldn't view because telescope would have to crash into pillar. Drot...)

☑ Betelgeuse

12/31 Leena Akhtar → eyepiece was not in telescope! 11

1/8/2018 Mirac Surgen & Julia Englebent.

1/10/18 Spotted flare of Iridium 58 satellite (Magnitude -7.0!)

The sky was cloudy today, but was still very bright.

Jeongwa Oh

The Stars are so pretty.

Isabell Lee

Such a beautiful views!

Carrie Kim

The most beautiful night ever in Boston!

이명진

아름다운 밤이네요.

잊지 못할 추억이네요.

감사합니다 :)

!!

Ikeoluwa Adeyemi

Crisp. Cool. Starry Night.
New experience. New Friends.
Unforgettable.
