Looked at Jupiter through the Doh on the deck!

→ Saw Jupiter + its 4 moons.
 Noticed that if you add the angles together with the horizontal, it gives the year the world will end.

Ken Brewer → Found Scott making out w/ Kelsey. What's up with Harvard guys and Wellesley girls anyway? Also figured out how to turn the telescope into a death ray. Will use it to destroy the martians that have been talking to me lately!

heard melody of carelessness
 whisper coming from Jupiter. Proof life forms there like we living in the 80's?

Took a look at Jupiter - 4 moons visible! - and ~~also~~ also
Spent quite a bit of time looking at the moon. It wasn't
quite a quarter full, but it was still quite a sight. Also tried to get a
good view of Vega, but it wasn't really ~~coming~~ coming into focus. An well-
something to look forward to! (Possibly wind?)

11/02/08

I saw the moon after such a long time; set at about 7.10... Saw
Jupiter + its four moons - which is the moon that's farthest
from the other three?? Vega's super bright too.

11/29/08 telescope worked gloriously after we removed the lens cap.

The above statement is ^{inaccurate} ~~not~~, (with the exception of the word "telescope")
It should read:

telescope provided adequate semi-blurry image of a star after the Yale explant to the Harvardite that the felt on the end of telescope was a lens cap and thus impaired the functionality of the telescope.

The view from the observation platform was great. I'm a sucker for city lights. I'd just like to point out that the said Yale came to Harvard to escape New Haven. The one blurry star was indeed glorious. Unfortunately we missed Sagittarius. Max was right (but he needent be smug). Outside we enjoyed the city lights and performed the ridiculous, but highly effective Hypothermia Dance.

I had it great, about half an hour or so after sunset - not too cold but very clear. The moon looked nice, crescent, but I was low on time so I went straight to the good stuff. Jupiter came through nice and clear. I could easily see four moons, and I even managed to make out the atmospheric bands after a little while. Venus was right next to Jupiter, so I moved on to that. It was huge and insanely bright, I could easily see what phase it was in:  too bad I can't draw... But yeah, very bright and clearly in the halfway phase. Great stuff.

Went to see the glorious city lights on a cloudy night? Still can't figure out what that blue building is downtown. Emily thinks a dragon lives there, but I think she's crazy - dragons don't exist, silly girl. But she did point out that the bunker hill monument, we having not seen it, should see it. Meanwhile, we saw a dragon fly out of the blue building. Geez, now I feel really dumb.

Dear Journal,
 Today was a fun day at school. Becky smiled at me and Cindy put her hand on my arm for a second. I think Becky is kinda weird but I think she likes me. Maybe I can use her to get to Cindy? Cindy is a total hottie. I've been working some solid game on her and she's starting to get into me. I know Ken Brewer likes her too but he has zero game and I think Cindy thinks he's pretty weird too. Anyway, I know Ken cheated on his science test too so he's hurting pretty bad in life. Poor Ken. Maybe I should teach him to be like me.

2/25/09 Came up to see the sunrise. Was waiting for a friend to join me, but he got into his P-set & so forgot about everything else.
It was a bit cloudy though. I will come to see the sunrise again when the sky will be absolutely clear.

Jelena Petrova

2/25/2009 10:55pm came up to look for ^{comet} Lulin - should be between Saturn and Regulus - great prospect for viewing on the deck.

Also, could not find the comet - a bummer! Hopefully there will be

some clearer, darker nights soon!

PS: SOMEONE LEFT THE LIGHTS ON!

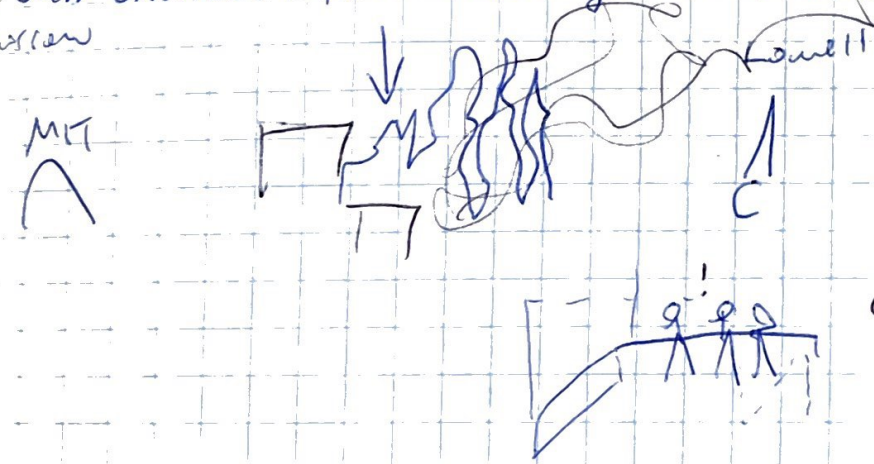

2/26/09 8:40pm First time up here this year since certification.
 Mostly just wanted to relax a few minutes on the observation deck,
 but also used the telescope briefly. Nothing that exciting... a lot
 of ambient light and haze, but a few nice stars out farther up.
 Big lens cap is falling apart - more tape? And now to problem
 sets... ~~9:10pm~~ 9:10pm - Bill Rose

2/26/09 10pm Also my first time up in a while - very hazy out tonight
 as Bill also noted :-). Checked out some of the smaller

 Oneday when ~~or~~ looking at the heavens he saw the face of beautiful young girl. It was love at first sight. Unfortunately, Dudley had maliciously shifted his telescope's equatorial axis, so within minutes his beloved's face was gone forever - never to return. Grief stricken, he decided to take his last flight without a broomstick. He gallantly climbed on a turret, sailed through the overcast sky, and landed headfirst on a Christmas tree which was summoned by Voldemort. Ginny mourned his death for a week and then started dating Neville.

Lauren is the best teacher (that's my observation)

Firth McEachern

Contrary to popular belief, I've never officially gotten ~~his~~ access. It was my goal before graduation! Thank Lauren.

came to see the ~~view~~ view

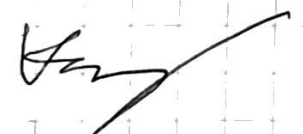

5/11 1:00pm Taylor Stamer
Fabian Poliak

came to see view - cloudy

Under, Sofia House - Clinic

5/11/09 - Went to roof. Smoked pot with a bunch of kids hanging out from Yale. Don't know how they got up here. Actually, only they smoked pot, in case anyone reads this.
- Scott

5/11 Discovered to my knoach for geography around the Boston area... btw these drawings are insane esp while high. Enjoy! left some pot under ladder.
- Sarah

5/11 came out to chill. it was kind of chilling

Brought some chick up. Fucked Her.

Tuesday May 12
Susanna, even saw Saturn.

5/12/09 - 11 pm
It's reading period and we need a study break.
The observatory is the only empty place to go ~~to~~ watch a movie at this hour.

just wanted to check if our ID worked! They do! Reimig so we didn't get to use the ke/score

LAST page! We're gonna need a new book.

~~mid-day~~ mid-day views, while

5/13/09 Matt and Pierre visited the observatory on this BEAUTIFUL night. Saw moon.

5/13 Sunrise! - Josh

5/13/09 Andrew Milowski Boston at noon

5/13/09 - Went to see the skyline. It's still there, along with Henry Zaincome's bridge, which apparently is the one with the cool lights. Noticed Ken Brewer walking along dejected from failing all his finals and having no game at all. Maybe he should stop going exclusively after girls that could be his older sister. Go cougars!
- Scott

5/13/09 looked at the awesome Boston Skyline! ~~So~~ Great night for viewing!
- Paige

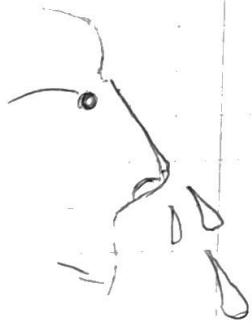

5/14/09. Kasin looks hot in the rain. - Fifth.
→ P.S. Motor was ON! Turned it off. (Thank to Kasin she noticed).
P.S. Scott, you rule.

5/14/09 Just coming by to stand in the balcony.
- SA.

5/15 The sunset was beautiful!
- Rachel, Megan, Alyssa, Brooke

5/15 - Looked into peoples' rooms. I don't know what these freshmen are doing! Twinkle, twinkle little star.
I know exactly what you are, Ken Brewer.

- Scott

Ken Brewer

5/15 great view but a bit cloudy to see stars

5/19 May 2009: 13:18

Came to reorient myself with the big telescope & dome, and mainly to check and see if my card access has been granted.

Things seem fine, although it looks like we need a new log book 's

May 20, 1:00 AM Great view tonight! A document w/ telescope instructions
would be helpful as a refresher for all who took the class but forget.
Sam Humpal & Allison Rosenberg

P.S. Need new lenscap! Came in here and found
it was off and broken in two.
