8/16 Tonight on the deck, my friend Marty and I noticed strange lights coming from Southie. After careful observation, we discovered that the lights were actually sirens. Cop cars, ambulances, and fire trucks. We soon discovered that the disturbance was, in fact, the Stay-Puff Marshmallow Man. No more picking the way we want to die.

 he's the robot of love, he's in love
 with Jupiter. Because, of course, Jupiter is
 the planet of love, not to be confused with the planet
 of robots. It will become the planet of robots
 when he arrives, because there's no where else
 he'd rather be so he's going to find his
 way there! This has all happened in the distant
 future, the year 2000, when robots rule the earth.
 There is only one type of dance left — the robot.

Zachary Herring and Georgina Parfitt...
 had a birthday party.

03/03-04/10

I was here w/ a cute guy

Chris

P.B

3/4/2010 2pm

- Replaced thumbscrews on eyepiece holder. NOTE screws are 1/4-20
- Borrowed lens cap to seek repairs.

(only use nylon screws in soft brass)

John

3:15pm

- Delivered new nylon lens cover! Awesome!

John

3/4/2010 -

I learned a lot tonight. Blue light = some weather, red solid? red blink = rain. Raining tonight. And 273 steps. With Jr. high kids. And how to get a keg into a dorm. Way better than nylon lens covers!

Froze a bit. Learned that I am a Dionysus (and give the middle finger to the world - which makes way too much sense). Saw a great skyline + heard great tunes!

3/4/10 Nice crisp night. View is always beautiful. - Alison
10:30pm

3/4/10 Caught 5 airplanes tonight. 78 left until G's wish comes true. 95 more for me. - Brian
1:04am

3/5/10 10:30am Lauren, Tom and Dom installed some a hot Chandra poster. See "Stellar Evolution" by the Hercules painting.

Jurgen

(Lauren also took down a transit hologram postcard for thesis demonstration purposes... she doesn't feel guilty though because she obtained and installed the transit postcard in the first place.) - L.W.

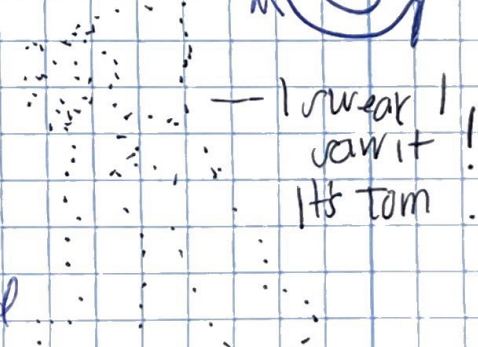

3-5-10 4:00 pm Oli Donora showed parents the deck!

3/5/10 Tom Rice showed off the telescope (Pleiades, Orion Nebula) to folks in

3/5/10 We're the folks that Tom showed off the constellations to. Thanks. GAOPB

♡ Pleiades, the seven sisters

11:15pm Katerina-Kalsang-Chukyi-Butter-Grose-fragolina-Dehight was here, and I thoroughly enjoyed watching our planet move through the sky.

- I swear I saw it!
It's Tom.

Mister Kan Eye joined the above named for an evening of thoroughly enjoyable stargazing and storytelling. I felt awe.

3/9/10 Raati Alidina 10:21

3/9/10 Juliana Austin 3rd time here, last time was for NASA shuttle launch!

We observed Orion, Aldebaran, Mars, Gemini, Sirius, Ursa Major, and many other stars/constellations/etc.

Through the scope, we saw Saturn & moons, probably Titan

3/10/10 Stephen DeVience
Looked at heating issue. Turned off heat in stairway, which may help.

3/12/10 Victor Galli - A big HOWDY from TEXAS :)

4th of March, 2010

The weather today is dreadful. According to the Lantage PPO2, it has rained 7.67" of rain since the "rain storm" started on the 13th. Harvard looks gloomy, and gray. I came up with my friend Jessica to show her the telescope/skyline.

F. Mauricio Santana

03/15/10

Mauricio's friend Jessica: Harvard is great, wish I could have seen it under different weather conditions. The paintings in this room are great, especially the "Southern Cross" one. Greetings from Johns Hopkins in Baltimore :)

Timin Soli

3/16/2010 8:00 - 10:00 PM

Nice view of Orion Nebula.

Mars is showing a nice ice cap, but seeing is poor for high power.

M78 was barely visible, not much structure can be made out.

Dome a bit leaky from leftover water after rain.

3/18/2010 -

Determined tonight why girls like trashy TV shows. It's really that they want to be those girls. Kinda like how girls call each other sluts, you know?

This we learned by observing tonight. Enlightening. Also learned when something is small, it's cute. Not cute? Make it smaller.

There is some criminal activity in Harvard Square.

Further investigation to follow -

Lauren

3/20 12:00 am.

Took a friend up to show the cool stuff
F. Mauricio really liked the skyline & the weather relay.
F.H.T

3/21 4:20am

I came up today with my friend F. Mauricio to see the telescoped skyline. He really enjoyed the view! Yeah Mauricio!

♡ J

3/21/2010 4:20:58 a.m.

F. Mauricio Artivia brought me to see the Boston skyline (immediately after ♡J left). The weather is gorgeous, however, there is a lot more light pollution here than where I'm from (south Texas). We managed to find the Big Dipper (but then we lost it).

I am ^{the real} F. Mauricio! Not your fictionalized, namby-pamby characterization of him! I assert my selfhood!

I AM I AM I AM I AM I AM

My soul and body scream it to the sky,

Sincerely,

F. Mauricio.

No, bitch.

F. Mauricio

Oh ho, don't be fooled.
His F stands for:

- Falsehood
- Fakeness
- Fiction, pure fiction
- Forsooth

I am I. He is not I.
